PREMIUM
CAR SEAT COVERS

Crafted from the finest quality PVC Vinyl with PU top coat, it is the nearest alternative to genuine leather with a host of additional advantages for car seat cover application. The exclusive high quality fabric ensures much longer life, exceptionally superior comfort, apart from giving anti-fungal, anti-bacterial and chemical odour free properties. These seat covers are perfectly complimented by other quality raw materials like foam, inner lining, strong nylon thread stitching and adhesive lamination. More over the Signature Collection comes with an unmatched 2years warranty.

Available in one of the largest range of colours and designs, the Signature Collection is stylized to perfectly fit the contours of every car seat, adding a wow factor to your car that is beyond your imagination.

The Signature Collection is available in Duro Leatherite (DL), King Leatherite (KL) & Neo Leatherite (NL) PU/PVC options.

PRO LEATHERITE with SRE Technology

Top Gear presents an exclusive range of PU/PVC fabric for its premium range of Car seat covers in **PRO LEATHERITE (P/L)** with SRE technology

A fabric embedded with Super Reinforced Elastomers. Processed with exceptionally superior raw material imported from Europe, this hybrid material gives you the best of both worlds, genuine and artificial leather.

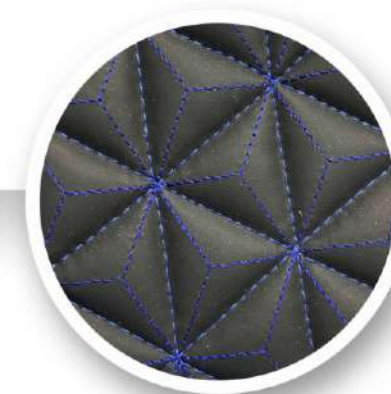

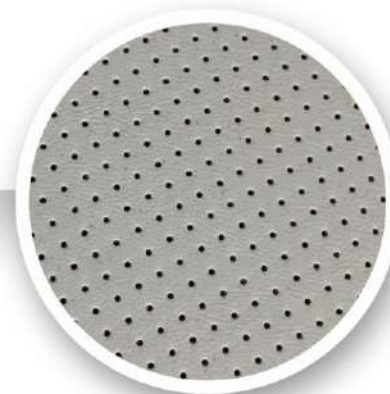

Advantage over conventional PU/PVC leatherite

- Improved abrasion and strength for longer life
- Exceptionally elegant genuine leather feel and appearance
- Light weight for better grip and shape
- UV resistance for maintaining sheen and colour in strong sunlight
- Heat retardant for less heat absorption
- Fire resistant for safety
- Thickness : 1.00 mm - 1.25 mm

BREATHER A/R

Presenting all new Breather Nex that adds a new dimension to car seat styling. Designed with alluring geometric perforation patterns, these seat covers add a touch of class to your car, besides enhancing the unmatched seating comfort.

Made porous through the most advanced manufacturing process, this high quality PU/PVC fabric allows free flow of air for a super cooling effect, while driving in hot conditions. Breather NEX not only enhances design value to your seat cover but also adds to its life and driving pleasure.

Seat Heating & Cooling System

Just remember those blistering hot summer days when we open our car and sit on the burning hot seats or the winter days when they are spine chilling cold.

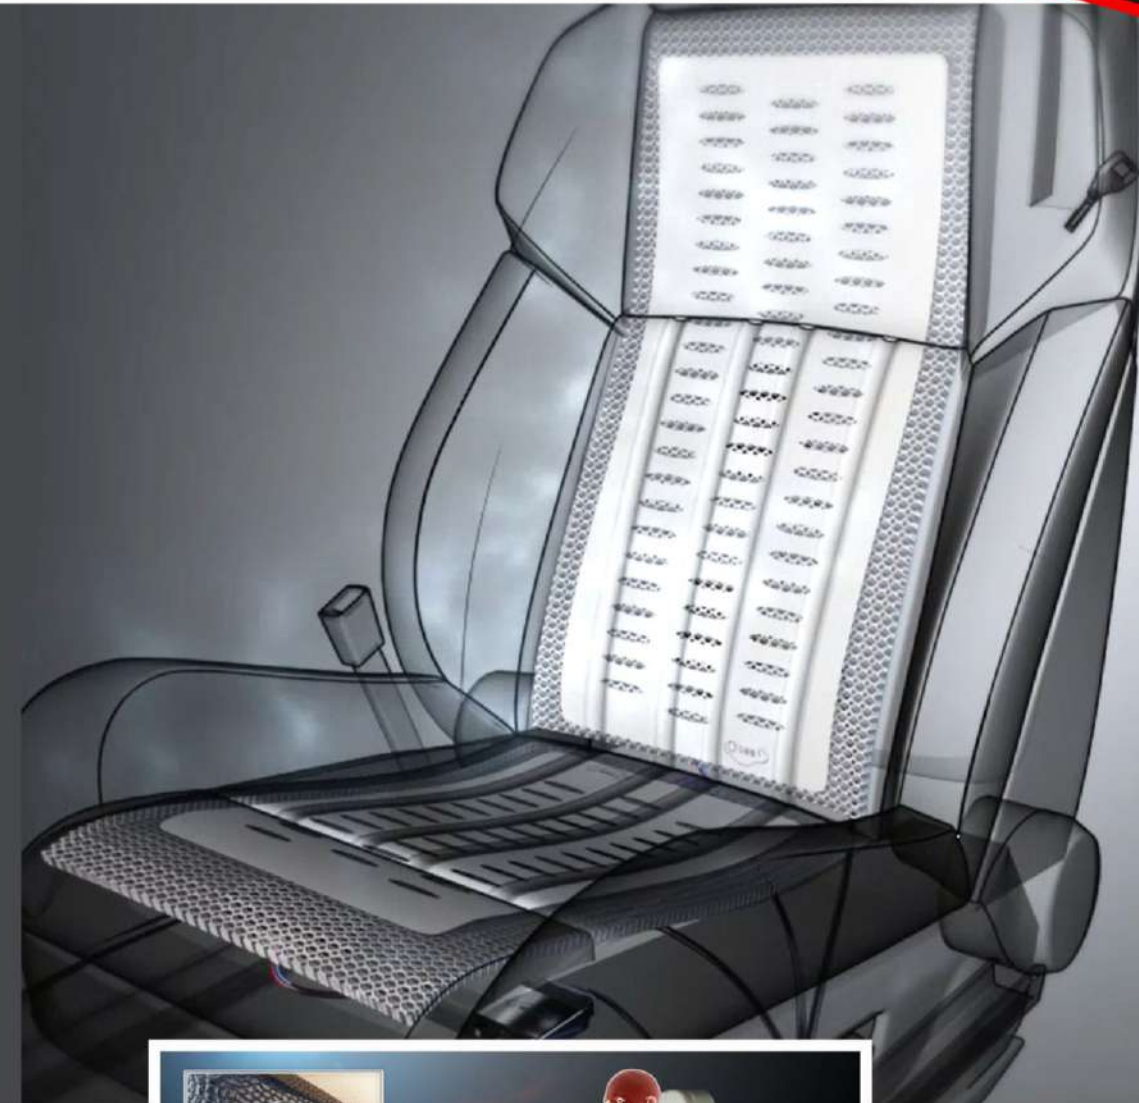

Although vehicle air conditioning system makes the car compartment comfortable but they are able to reach only the front of the passenger and the back still remains sultry and sweaty in hot or humid conditions.

Introducing KLIMATE, a breakthrough in car ventilation system that easily adjusts your car seat temperature by simply rotating a Magicontrol knob.

Brought to you by a company known for its top of the line Car Seat Covers, 4D Mats and other unique car accessories.

KLIMATE is powered by finest build quality and some patented components with long operational life. This ventilation system not only reduces your driving fatigue but also protects you from various allergens and harmful bacterias that are developed due to sweat.

Easy to install and operate KLIMATE is a boon for avid car travellers making their journey comfortable and healthy.

Keeps the car seat ventilated with cool air using 5 high quality long life, low noise nylon fans.

Keeps the car seat warm using hi-quality intelligent alloyed heating wire mesh, embedded in non woven fabric.

Quality that makes KLIMATE going !

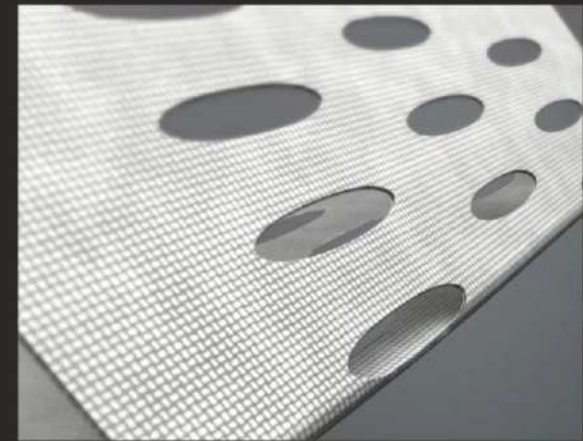

Seat equipped with 5 superior quality fans and flame retardant non woven heating pad

Hall chip motor

Locked rotor protection function to ensure safety

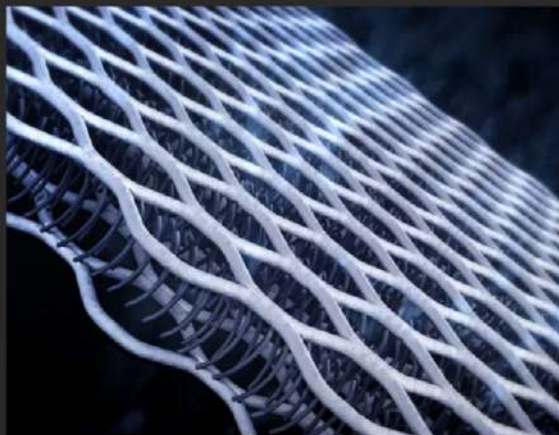

Intelligent alloy heating wire mesh in non woven material, tested for more than 5000 times folding

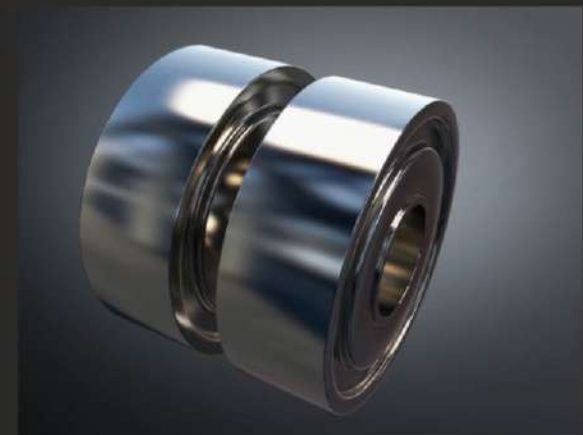

Patented fan assembly

Patented Low Vibration & extremely silent fan made with special nylon material

Smooth ventilation through honey combed high quality cotton polyester and nylon material

Fan motor powered with high quality bearing for extremely long life and low noise function

STEERING WHEEL
COVERS & JACKETS

PREMIUM STEERING COVERS & JACKETS

HANDCRAFTED STITCHABLE STEERING COVERS

Elegance and style redefined. Top Gear offers a unique range of India's first steering covers made with Hi-Grade Microfibre Leather.

A top quality synthetic leather made with non woven fabric coating with a layer of high performance PU. It gives a real leather feel and has high tear and tensile strength, apart from excellent ageing and abrasion resistance. Also having excellent anti bacterial and anti odour properties, microfibre makes this material an ideal choice for Steering Covers.

CAR FLOOR MATS

LEATHERITE CAR MATS

PRESENTING, 4D car floor mats. Customised to your car's floor contour and dimensions, these bucket shaped 4D mats fit perfectly into your car, giving it a plush and luxurious look.

4D mats use the finest quality of leatherite, stitching thread and cushioning foam.

As a **unique feature** 4D mats are made with super fine quality base carpet that helps it to retain shape for a much longer time, once moulded, than its cheaper look-alike imitations.

Easy to clean and install, these mats come with optional top layer of PVC coil mats and Honey comb mats in various colours, that are fixed to the base mat with a lockable tich button. The driver side mat comes with a heel pad, that not only supports the heel but also prevents mat wear and slippage during driving.

Available in various colour and design options to match your car's interior and other upholstery, 4D mats are setting a benchmark in quality for others to follow.

So dress up your car floor the way the world does, with 4D Leatherite car mats!

4D Mats

v/s

Conventional 5D
& 7D Mats*

Custom designed, bucket moulded to perfection, covering the entire floor and side walls.

Ill-deigned moulds smaller in size, that do not fit perfectly.

Base carpet made from imported low density monomer ethylene fibre which is highly stable under rigorous usage conditions and helps the mat to retain its shape for a much longer period once moulded.

Soft EVA base carpet that does not provide enough stiffness to the mat for retaining its bucket shape. Over and above it's toxic, environmentally hazardous and gives bad odour.

100% manufactured in-house using ultra low abrasion PU/PVC Vinyl with high density hard PU Foam and top quality stitching thread, ensuring a longer life.

Low quality imports using cheap PU/PVC Vinyl with very high abrasion that wears much faster.

That's why
AR 4D MATS
are superior

UNIVERSAL CAR MATS

UNI-CLEAR COIL MATS

India's First Health Car Mats

BREATHE PURE. BREATHE HEALTHY

Most PVC mats that you buy use recycled PVC resin which produces toxic air and create bad odour inside the car, especially when your windows are closed. This polluted air can have serious health hazards that escalates when the car is parked in hot conditions. UNI-CLEAR Coil Mats are manufactured only from virgin PVC (check for the transparent base of the mat), this mat gives not only a much longer life but produces extremely low pollutants.

UNI-FIT COIL MATS

COMMON FEATURES FOR UNIVERSAL CAR MATS

Anti-skid top for firmer foot grip

Robust Heelpad

Colour options available

UNI-STRIPE COIL MATS

UNI-COMB CAR MATS

Hook & loop binding base that prevents mat movement

ACCESSORIES

MEMORY FOAM CUSHIONS

5 YEARS WARRANTY*

Top Gear offers an exclusive range of Memory foam cushions for your driving comfort. Memory foam is basically polyurethane with higher viscosity and density. Memory foam gets easily molded into your body shape, when subject to pressure and body heat, due to easy passage of air through its cells. Top Gear memory foam cushions are ergonomically designed with care to provide full support to your back or neck, for giving you immense driving comfort. They have been aesthetically attired too in elegant velvet fabric to match your car decor and style. All memory foam cushions come with an unmatched 5 year warranty.
